

# GET READY FOR NIS2

## NEW BINDING EU REQUIREMENTS FOR MORE CYBERSECURITY

*For many companies and organizations the NIS2 directive (EU) 2022/2555 will impose mandatory security measures and reporting obligations from October 2024 - even for many that were not previously affected.*

### » WHAT DOES NIS2 MEAN?

- Second EU directive on network & information security

### » WHAT ARE THE GOALS OF NIS2?

- High common level of cybersecurity in all 27 EU countries
- Uniform security standards across the EU
- Creating a framework for secure innovation & digitalization through clear guidelines

### » NIS2-CHECKLIST

- Development of an ISMS incl. concepts for risk analysis & security of information systems
- Prevention, detection & management of security incidents
- Business continuity (e.g. backup management, disaster recovery) & crisis management
- Security in the supply chain
- Security measures in the procurement, development & maintenance of IT systems
- Evaluation of the effectiveness of the measures

### » WHO IS AFFECTED BY NIS2?

- Public & private institutions in 18 sectors, with at least 50 employees or at least € 10 million annual turnover

### » RESPONSIBILITY OF THE MANAGEMENT BOARD

The management must monitor the implementation of the measures, take part in trainings and is liable for violations. If the measures are not verifiable, fines (up to 2% of annual turnover) must be expected.
